## OFFICE ACTION

### *Claim Objections*

Claims 23-29 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims 23-29 not been further treated on the merits.

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-9 and 18 are rejected under 35 U.S.C. 102(a) as being anticipated by Ng et al. (2003/0197918).

Claims 1-5, 7-9, and 18, Fig.1 shows a mode-locked laser characterized by comprising:  
a master laser 100 which generates master laser light;  
a mode-locked laser section 102 including at least a modulating section, an amplifying section, and a bandwidth limiting section in an optical resonator, the bandwidth limiting section reducing mode partition noise; and a signal generating section which generates a periodic signal serving for mode locking of said mode-locked laser section and to be applied to said modulating section (As evidence in US2004/0076199), wherein

said master laser light is input to the optical resonator of said mode-locked laser section to cause injection locking.

Art Unit: 2828

Claim 6, Fig.1 shows an isolator and a circulator 114.

***Allowable Subject Matter***

Claims 10, 12, 14-17, and 19-22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The above prior art fail to teach the limitations of the claims.

Claims 11, 13 are also found objected to their dependency of claims 10 and 12.
